

NEC DISPLAY SOLUTIONS AND INNOVATIONS **2011**
showcase

6TH APRIL 2011 BATTERSEA POWER STATION LONDON SW8 5BN

TeamMate®

INVITATION:

We are excited to announce that we will be having the 3rd NEC Solutions Showcase on Wednesday 6th of April at the iconic Battersea Power Station and we would be delighted if you would attend.

For anyone buying, installing or specifying an interactive display, video wall, digital signage network or projection solution the NEC Showcase offers you a chance to see the solution in action and get a debrief on how the solution was constructed from one of our accredited solutions partners.

NEC will also be previewing some of the new technology releases that will influence the display market in 2011.

To focus your attention the showcase will be split into industry zones that will include;

- Education
- Digital out of Home
- Control Rooms
- Professional Office / Meeting rooms
- 3D Technology
- Green Display Technology

In addition to the zones above we will be hosting 2 seminars in conjunction with the 'The Screen Forum.' They are "Education – avoiding the cuts" and "Wayfinding" – from research taken at Westfield Shopping Centre. The Screen Forum UK was established in 2006 - and is an independent group dedicated to the ongoing development of the digital signage industry. Its members include representatives from all aspects of this rapidly growing medium, and its events aim to promote best practice across the industry through the sharing of expertise and thought-leadership.

This is a unique opportunity to join us for the day, and get hands on experience with our accredited display solution partners. We will be demonstrating the solutions this year within each zone with a presentation, showing how we can help you develop the right solution and why NEC should be your first choice for display technology moving forward.

Join us for either the morning seminar with the Education session or Wayfinding in the afternoon or both!

Solution partners including SMART, Instore Media, Scala, Nexus, Pixel Inspiration, AMX, OneLan, U-touch, CBS, TeamMate, Extron, Dexon, Lifesize, DisplayLite, DAS Business Furniture, Ergonomic Solutions, Matrox, Crestron, NexNix, VBrick, Saturn Visual, Whitespace, 3D International and Amazing Interactive and many more.

WHEN : Wednesday 6th April 2011

WHERE : Battersea Power Station, Gate 1, Cringle Street, London SW8 5BN

The power station itself is a truly iconic building worth a visit, it will one of the last opportunities to see it in its natural state as it will be completely refurbished in 2012. In contrast to the new control room solutions on display we are also offering free tours to see the original 1930's Control Room, we do have limited spaces available so please let us know when you register.
