

TeamMate brings people, information and technology together in a truly innovative way by integrating IT, AV communications and presentation systems within a single, powerful mobile or static unit.

# TeamMate®

## TeamMate totem Chic mounting solutions

### Features

Multi configurable with all types of AV and IT equipment.

Simple versatile mount for any type of display.

Compatible with new aspheric short throw projectors.

Compatible with all large screen flat panel displays.

Input/output panel for all communications and AV/IT systems.

Finished in silver and stainless steel with optional secure shelf.

Optional dual screen mounting arrangement.

Comprehensive cable management system.

Optional rack enclosure for AV/VC and IT peripherals.

### Benefits

Increases efficiency of meetings and presentations.

Consolidates all audio visual and IT functions.

Integrates with video conferencing technology.

Easy simple installation without complex fittings and fixtures.

Upgradeable to future technology at ease.

Ideal architectural structure for challenging environments.

No messy cables.

Aesthetically pleasing and robust design for all environments.

Can be used in conjunction with other TeamMate units or third party lecterns.

The Totem converts any work space into a high level meeting and presentation environment, providing a chic yet professional mounting solution for any heavyweight modern display, eliminating the need for structural changes or unsightly fixings, accommodating single or twin mounted flat panel displays.

- A flexible alternative to fixed installations
- Available in three standard lengths
- Break-out areas and flexible learning spaces
- Brainstorming or business presentations
- Ideal display option with other TeamMate units
- Electronic classrooms, universities and colleges
- Self contained secure display option
- Supports full multimedia output
- Web enabling your meetings and presentations
- Quick and fuss-free support for AV/VC requirements

# TeamMate®

The TeamMate Totem has been carefully designed to overcome the issues and problems otherwise associated with fixed installations. Ideal for open plan environments, listed buildings, or areas that have limited mounting or fixing options for display hardware. The Totem can be deployed as a floor to wall, or floor to ceiling solution with the option of mounting a single display up to 65" diagonal, dual 50" displays, or a short throw aspheric projection device. Also available with 60 or 72 inch diagonal projection screens. Furthermore in conjunction with a short throw projection system, the projection screens can be replaced by 60 to 72" interactive whiteboards for an enhanced learning experience. All connectivity is managed through an optional simple and effective patch panel at the base of the unit. For convenience, a stylish TeamMate rack assembly can be added to the Totem for safe and secure integration of presentation and conferencing hardware as required.

## What is included
