

TeamMate brings people, information and technology together in a truly innovative way by integrating IT, AV communications and presentation systems within a single, powerful mobile or static unit.

TeamMate®

TeamMate WorksZone Intuitive collaborative

Benefits

Allows people to share ideas and work on projects as a cohesive team.

Blends technology with furniture to create a intuitive collaborative environment in a connected world.

Pre-configured to individual specifications; quick to install and easy to move around.

Aesthetically designed to harmonise with all working and learning environments.

Open design for use with input panels, control system, or any other multimedia peripheral

Compatible with all audio visual and IT multimedia components.

Stable durable platform with many security features.

Stylish design with range of worktop finishes and colours

Built in mounting system for single or dual screen set up.

Can be configured for video conferencing or visual collaboration.

Hidden tamperproof cables and self contained power management.

Ease of connectivity to large screen display systems or other WorksZone.

The new TeamMate WorksZone combines contemporary furniture designs with cutting edge technology in a self contained intuitive environment for a connected world. Now students can easily share information and ideas, or work colleagues can collaborate together increasing productivity or enhancing the learning experience.

- Flexible learning environments
- Meeting space or break out areas
- Promote the flow of ideas equally and quickly
- Shared resource across any organisation
- Easily configured for specific requirement
- Access and share digital information
- Secure mounting for single or twin monitors
- Traditional or contemporary environment
- Easily configure for technology compatibility
- Ease of peripheral upgrade and serviceability

TeamMate®

The TeamMate WorksZone takes its components from a number of existing TeamMate designs offering a flexible collaborative working and learning furniture solution helping participants to access and share information quickly and seamlessly in a digital age. Most learning and presentation spaces are designed for teacher or presenter led delivery, where information or knowledge travels in one direction. The WorksZone promotes the flow of ideas by helping people access and share information, quickly and seamlessly, where everyone has equal opportunity to get involved with effective collaboration and contribution. Many spaces used for presentations, meetings or learning are generally used for a specific set of activities or singular purpose. The WorksZone easily converts these spaces into a more dynamic and adaptive environment bringing technology and people together working on a range of tasks, or solving pressing problems and changing single purpose into limitless results.
